

Part Number: 4174300XX-3

Model: DD-1920-VGA

DATE	VERSION	SUMMARY OF CHANGES	NOTE
26 March 2015	00	<p>Production release for pilot run</p> <p>Bare PCB: 017430000-3; P/N 417430000-3 BIOS: U11, V1.00.00 (Flash SST25VF040)(new) U2, V0.40 (ARGB DDC, 24C02) (same as ALR-1920, 417270022-3)</p>	<p>ECN# 870689501</p>
30 June 2016	00 to 01	<p>Hardware no change Release new firmware on U11</p> <p>(1) Improve the accuracy of backlight level in PWM and D/A mode. (It was found that the backlight level is not linear to the percentage of the level and different ranges for different PWM frequency or in D/A mode, also the system backlight level control function was replaced by own method)</p> <p>(2) Remove "CVT Timing" selection in the OSD menu (under "Display" > "Widescreen mode" > "CVT Timing") due to this "CVT Timing" selection function is exactly the same as "Video Timing" selection.</p> <p>Bare PCB: 017430000-3; P/N 417430001-3 BIOS: U11, V1.02.00 (Flash SST25VF040)(changed) U2, V0.40 (ARGB DDC, 24C02) (no change)</p>	<p>ECN# 870689592</p>
