

Procedure for DDC on-board programming on SVH-1920 :

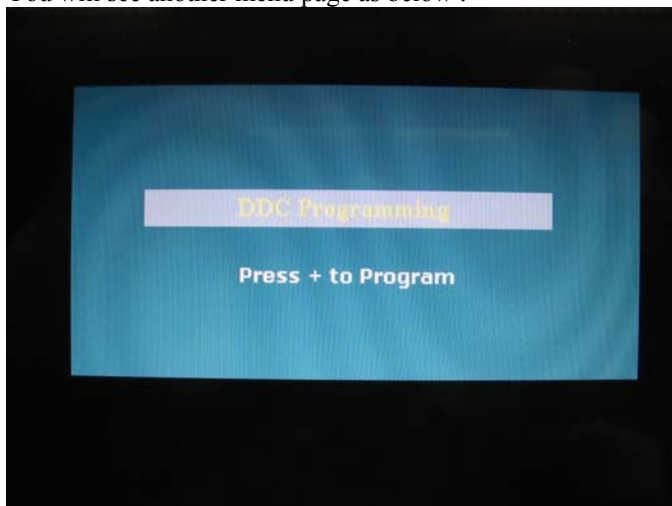

STEP 1 :

Press and hold “MENU” button on the OSD switch mount and turn on the controller to enter the “Programming mode”.

“Programming mode” wordings will display on screen on the target programming board. (See below)

Step 2 : Press “MENU” key to go into the “DDC Programming” mode. You will see another menu page as below :

Step 3 : Press “+” on the OSD switch mount to start programming.
And you will see the “Program DDC OK!” on screen if you can successfully downloaded.

Step 4 : Switch off the controller

-END-
