

Interactive VideoFlyer Options

Touch Screen & Barcode Scanner

The VideoFlyer™ family are Digital View's range of high quality LCD panel & ViewStream™ media player combinations. These are commercial quality systems designed for 24/7 playback; making them the right choice for retail, museum and professional environment applications.

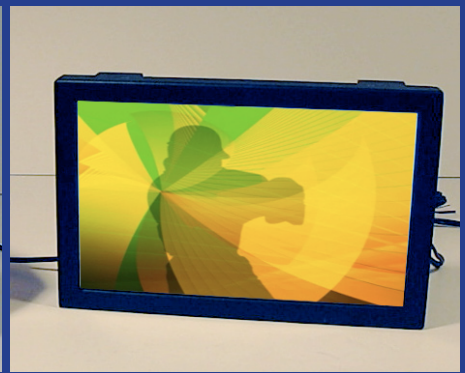

Touch Screen

Touch The Screen To Start The Program

Navigate Through A Video Menu

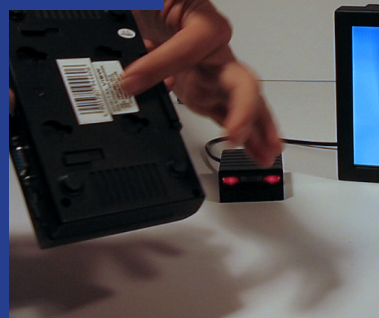

Select The Video To Watch

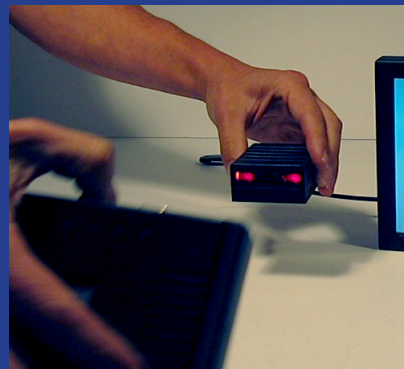

The **8-PIN Button Interface** allows for the direct input of items like simple touch screens that can trigger up to 8 content selections at any one-time. The triggers are programmed using Digital View's free software tool 'DV-Studio' - which enables the creation of a complete multi-layered interactive structure. Other devices that can be plugged into this interface include button boards, motion sensors, levers, light sensors and other basic contact devices.

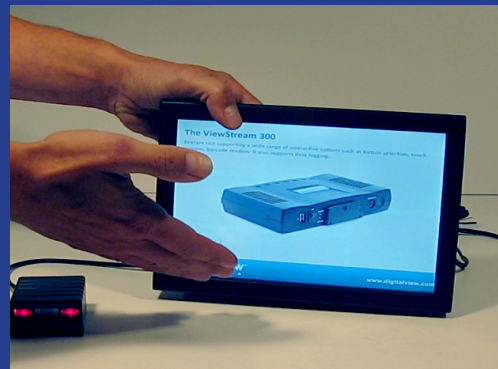

Barcode

Select A Product Or Exhibit

Scan The Barcode

Watch The Relevant Video

The **RS-232 Interface** enables complete control of all media functions, including both incoming media triggers and outgoing short codes to control other devices. RS-232 devices, like barcode readers, can be programmed through 'DV-Studio' for direct access to as many selections as required (>1000 'go-to' commands). Other devices that can be plugged into this interface include device control management systems such as AMX & CRESTRON.
